SECTION 3	- HAZARDS IDENTIFICATION		

POTENTIAL HEALTH EFFECTS:

EFFECTS OF OVEREXPOSURE - EYE CONTACT: May cause eye irritation.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: May irritate skin. Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis (rash). Can be absorbed through the skin.

EFFECTS OF OVEREXPOSURE - INHALATION: Vapor harmful if inhaled. Vapor may irritate nose and upper respiratory tract. Vapor inhalation may affect the brain or nervous system causing dizziness, headache or nausea. Prolonged vapor inhalation may result in severe physical injury.

EFFECTS OF OVEREXPOSURE - INGESTION: This material may be harmful or fatal if swallowed. Aspiration of material into the lungs due to vomiting can cause chemical pneumonitis which can be fatal. If ingested, this product may cause vomiting, diarrhea, and depressed respiration.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS: Reports have associated permanent brain and nervous system damage with prolonged and repeated occupational overexposure to solvents. May cause kidney and liver damage as well as developmental and reproductive toxicity.

MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY CONTACT: None known.

PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT INHALATION

EYE CONTACT: Immediately flush with large quantities of water until irritation subsides. Get medical attention immediately.

SKIN CONTACT: Wash with soap and water.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

Note: Only trained personnel should give artificial respiration or administer oxygen.

INGESTION: DO NOT INDUCE VOMITING. Get medical attention immediately.

COMMENTS: Call 1-800-327-3874 if irritation or complications arise from any of the above exposures.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

______ Product Name: WEATHERFLEX CLEAR ADHESIVE SEALANT Revision Date: 06/04/2003 Page 4 _____ SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION ENGINEERING CONTROLS: Provide sufficient mechanical ventilation (local or general exhaust) to maintain exposure below PEL and TLV. Vapors are heavier than air and will collect in low areas. Check all low areas (basements, sumps, etc.) for vapors before entering. RESPIRATORY PROTECTION: If you experience eye watering, headache or dizziness or if used in the work place and air monitoring demonstrates vapor levels are above exposure limits, use NIOSH approved respiratory protection in accordance with applicable federal, state and local requirements. Consult your safety equipment supplier and the OSHA regulation, 29 CFR 1910.134 for respirator requirements. A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use. EYE PROTECTION: Goggles or safety glasses with side shields. SKIN PROTECTION: Solvent impervious gloves. OTHER PROTECTIVE EQUIPMENT: Provide eyewash and solvent impervious apron if body contact may occur. HYGIENIC PRACTICES: Remove contaminated clothing and wash before reuse. _____ SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES BOILING RANGE : N.A. VAPOR DENSITY : Heavier than air ODOR THRESHOLD : N. SECTION 11 - TOXICOLOGICAL PROPERTIES		
No product toxicological information is available.		
This product contains ethylbenzene. The International Agency for Resof Cancer (IARC) has classified ethylbenzene as a Group 2B carcinoger possibly carcinogenic to humans. While there is inadequate evidence carcinogenicity in humans, this compound shows sufficient evidence carcinogenicity in animals (IARC, 2001). The US Environmental Protagency (EPA) has classified ethylbenzene as a Class D carcinogen (no classifiable as to human carcinogenicity). This is based on the lack animal bioassays and human studies. The American Conference of Governmental Industrial Hygienists has classified ethylbenzene as a Confirmed Animal Carcinogen with Unknown Relevance to Humans. There be minimal risk when used with ventilation adequate to keep the atmoconcentration of ethylbenzene below the recommended exposure limit. Maintain adequate ventilation to prevent exposure above current OSHA ACGIH exposure limits. Workplace monitoring of the air to define ethylbenzne exposure levels may be necessary.	en - of of cectic cot cof shoul	on ld ric
